EXPERIENCE

Salesforce Technical Consultant

VISEO ASIA | May 2021 – Present (5+ years)

- Designed and developed custom end-to-end Salesforce solutions using Apex, Visualforce, and LWC for enterprise clients across the region.
- Built custom REST API integrations between Salesforce and external systems to automate data workflows and eliminate manual data entry.
- Optimized Apex triggers and asynchronous batch jobs to prevent governor limit bottlenecks and improve overall system performance.
- Developed modern and responsive Lightning Web Components (LWC) to enhance user experience and UI responsiveness compared to legacy Visualforce pages.

- Translated complex business requirements into scalable technical solutions across the SDLC with cross-functional international teams.
- Applied Salesforce best practices across all deliverables, focusing on code quality, governor limit management, and security hardening.

Key Projects:

Client	Region	Deliverables
Keppel	SG / VN / ID	Case Management (SUR, i12 Katong, Vietnam Retail Tenant & Shoppers), Stacking Plan LWC, Automation Email Weekly Report, Custom API Work Order Integration, Auto User Deactivation API, Service Request Form & Signature Button, Sustainability Urban Renewal Automation
CapitaLand	SG	LWC component for batch import of payment data — streamlined bulk data entry & reduced processing time
NTUC	SG	LWC for Web Contact Us page — seamless case creation and customer inquiry routing
PaxOcean	SG / CN / ID	Docking Ship Management System, Calendar Docking (Visualforce), Auto Calculation Docking Date (Apex Scheduler), Opportunity Supporting Document (LWC)
PPIS	SG	Event Membership Button (Lightning Component), Volunteer Page (Visualforce), Membership Page (Visualforce)

EDUCATION

Bachelor of Engineering — Electrical & Electronics Engineering

Politeknik Elektronika Negeri Surabaya, Indonesia | Graduated: April 2021

Final Project: Developed a Live Object Recognition System for blind assistance using Convolutional Neural Networks (CNN), achieving 92% real-time detection accuracy.

Diploma of Engineering — Electrical & Electronics Engineering

Institut Teknologi Sepuluh Nopember (ITS), Indonesia | Graduated: August 2018

Final Project: Designed a Microcontroller-based Coin Counter System for automated payment tracking.
